## **Together around the One World!**

Romania

Germany

### **ZOOM – Kids on the Move for Climate Action 2016**

175,000 children in 10 countries joined forces again and collected 1.7 million "Green Footprints" – their contribution to a better climate

174,624 ZOOM kids in 10 European countries collected Green Footprints during their activity weeks dedicated to sustainability and climate protection. Children in Austria, Belarus, Czech Republic, Germany, Hungary, Italy, Netherlands, Poland, Romania and Sweden earned these footprints by using eco-friendly means of transport for their daily journeys to school or kindergarten.

Even after the success of the Paris Agreement, the ZOOM kids have sent very clear demands to the politicians, urging them to take concrete and creative climate action.

The children emphasise that both they and their own children in the future will have to pay dearly if today's weak regulations aren't strengthened NOW!

## Together, 174,624 children in 10 countries collected

## 1,741, 200 Green Footprints

The children are very concerned about the global climate and therefore sent all their wishes and concerns to the participants of the UN Climate Conference in Marrakech.

They want to convince the adults to move together around the One World, just like the children do year by year during their ZOOM Activity Weeks. This report can only give a glimpse at the ZOOM activities in 2016

For further information also visit www.zoom-kidsforclimate.eu

ZOOM-Kids know: the Paris Agreement is just another step – Move on for Climate Action!

Czech Republic

Italy

At the end of their climate protection and sustainability activity week(s), the children drew their own footprint on a piece of paper and wrote or sketched their wishes and concerns directed to the participants of the 22<sup>nd</sup> UN Climate Conference in Marrakech on them. As the kids know that local politicians have to act as well, they also handed over their results and demands to their mayors and local leaders as well as to ministers of the environment..

## **Austria**

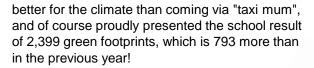

We collect Climate Footprints!
This was the motto in Austria, where children in more than 200 schools and child-care centres joined in. Together they collected over 281 570 Klimameilen or Climate Foot-prints.

The children together with their teachers spent several weeks dealing with the topic climate protection and eagerly collected Green Footprints. Again Clown Hugo visited several schools during their activity weeks and performed an action-packed workshop mobilizing everybody to use climate-friendly means of transport.

The VS Frastanz organized an extra mobility festival in the school to celebrated its enormous amount of collected footprints. There the pupils explained why walking, biking or going by bus is

"Riding bicycles or scooters and walking is fun!" This was the motto of school VS Weiz, the winner of the Austrian summer challenge. 20 days in row the tried to implement this motto very ambitious. For every environmentally-friendly way to school and back home they collected one sticker which the children were allowed to stick in their Klimameilen Album. In addition they could include paths that had been taken at the weekend, too.

### Österreich

#### Wir sammeln Klimameilen!

Auch 2016 beteiligten sich viele Kinder, SchülerInnen und LehrerInnen in Österreich an der Klimameilen-Kampagne. In mehr als 200 Schulen, Horten und Kindergärten wurden über 300.000 Klimameilen für klimafreundliche Schulwege gesammelt!

LehrerInnen und Kinder beschäftigten sich meist sogar mehrere Wochen mit dem Thema Klimaschutz und sammelten fleißig Klimameilen. Während der Sammelwochen besuchte auch der Klima-Clown Hugo mit seinem aktionsreichen Mitspiel-Workshop mehrere Schulen und mobilisierte alle zu klimafreundlicher Mobilität.

Die VS Frastanz feierte ihre vielen gesammelten Klimameilen beim Mobilitätsfest in der Schule, die sie während der Mobilitätswoche gesammelt haben. SchülerInnen erklärten, warum ein zu Fuß, mit dem Fahrrad oder mit dem Bus zurückgelegter Schulweg für das Klima besser ist als das "Mama-Taxi", und präsentierten stolz das Schulergebnis von 2.399 grünen Meilen, das sind 793 Meilen mehr als im Vorjahr!

"Fahrrad fahren, mit dem Roller oder zu Fuß unterwegs sein, macht Spaß!" - so das Motto der Sommersiegerschule VS Weiz. An 20 Tagen wurde der Versuch unternommen dieses Motto umzusetzen.

Für jeden umweltfreundlich zurückgelegten Weg gab es einen Aufkleber, den die Kinder in ihren persönlichen Sammelpass kleben durften. Dabei zählten neben Hin- und Rückweg auch die am Wochenende zurückgelegten Wege.

## **Belarus**

For the second time schools in Belarus joined the ZOOM Campaign.
Over 1000 pupils in 23 schools in Minsk,
Polotsk and Novopolotsk gathered
29,717 зеленых следа or Green Footprints.

During their days of action, the children worked on practical modules, did schoolyard projects and also wrote reports on their daily journeys to school.

Some of them made experiments about the greenhouse effect. Others interviewed their parents and grandparents about how they got to school when they were young.

The children also cut green footprints out of cardboard. On the footprints they wrote down their ideas on climate action.

#### Dear presidents!

I would like to ask you to take care about of our future and encourage everyone to use eco-friendly means of transport like e-cars.

#### Dear presidents!

I am Antonina from Polotsk and I am asking you to keep the air clean because I, my family and my friends as well as my grandchildren want to keep breathing it.

Please, cultivate as many parks as possible in our country and we promise to take care of them.

I am Alina from 2nd grade. Please, take care of the air so it will be pure in future.

I suggest stop cutting woods, recovering waste in the right way and using bio fuel.

Best regards, Alina

#### Dear presidents!

I would like to ask you to ban the production of plastic dishes and household goods, and produce everything only from natural materials – wood and clay and stone.

Dima Smehovskiy .

Предложения учащихся ГУО «Средняя школа №11 г. Новополоцка» по улучшению климата:

- 1. Перейти на экологический вид транспорта.
- 2. Способствовать озеленению планеты.
- 3. Выделять места для парков и скверов, строить велодорожки.
- 4. Не мусорить.
- 5. Машины оставлять не у домов, а на специальных стоянках.
- 6. Уничтожить пустыри, что поспособствует уменьшению выветривания почв, а, следовательно, содержание пыли в воздухе уменьшится.
- 7. Проводить техосмотр автомобилей два раза в год, сделать более доступным ремонт автомобилей.

## **Czech Republic**

In the Czech Republic, where ZOOM was coordinated by Nadace Partnerství again, 2,200 children from 15 schools around the country collected 16,693 Zelené Stopy (Green Footprints) and the children as well as the teachers greatly enjoyed it.

Although most of them were not collecting Green Footprints before end of September, some pupils marked their ways to school in maps already in late springtime and identified dangerous spots.

In Jedlí the pupils handcrafted a huge 'Zelená Stopa' for presenting their wishes and concerns to the climate politicians.

The children of the Elementary school in Horepnik tried to find out the differences between all kinds of means of transport.

In Frenštát pod
Radhoštěm the pupils
participated very
eagerly and together
collected 1,977 Green
Footprints. The kids in
grade 3b not only
counted their ecofriendly ways on their
poster but also wrote
down what they like
and dislike on going by
car, bike, bus or when
walking.

In Zbiroh they arranged a 'Pěšibus' action (pedestrian bus), that will be repeated several times a year and made a long Wishprints Poster.

In the Základní škola in Chomutov the pupils went outside to measure and then calculate how much space is used up by parking cars.

Učitelka zákadní školy Jedna radost v Poděbradech

Téma citlivého a zodpovědného přístupu k sobě samému a celé planetě Zemi se mě hluboce dotýká. Tato kampaň motivuje děti i dospělé v jejich okolí k zamyšlení se nad naším každodenním chováním i zajetými stereotypy.

The idea of acting in a sensitive and responsible way to both yourself and the entire planet touches me deeply.

This campaign motivates children as well as grown ups to rethink their everyday behaviours and habits..

## Česká republika

2 200 dětí z 15 různých škol z celé republiky nasbíralo v kampani ZOOM celkem 16 693 zelených stop. Chtějí tak ukázat světu, že jim záleží na životním prostředí i na jejich okolí.

Děti také mapovaly nebezpečná místa při cestách do školy a měřily intenzitu provozu v okolí. Během tzv. týdne aktivit diskutovaly o plusech a mínusech jednotlivých způsobů dopravy, účastnily se besed a soutěží či poznávaly, jak se děti dopravují v různých částech světa.

Kampaň ZOOM je součástí programu Bezpečné cesty do školy. Jeho prostřednictvím pomáhá Nadace Partnerství školám chránit děti před dopravními nehodami, podporuje udržitelné způsoby dopravy do školy a motivuje k jejich častějšímu využívání.

Green Footprints were also collected in Murnau. At the local handing over their mayor said: "We want to show that it is not necessary to bring the children to school by car. In Murnau the way to school has an average of about one kilometer - this can easily be done on foot." The children gave their mayor also some wishes to take along with him: More playgrounds and a pedestrian light here and there ...

Children of the Pestalozzischule in Neuss collected Green Footprints for four weeks! A final survey showed that most of them like to walk, ride a bike or scooter or come by bus. So they can meet friends on the way. Many parents took this as an impetus to renounce the car for the way to school.

In Allensbach, the children were asked what they want to be improved. First on their list were cars parked on the sidewalk as they make it difficult for them to take a closer look at the traffic.

The Kindergarten Pusteblume in Vöhringen is ZOOMing in since years! This time the children together thought about things they should do or better not do to better protect our beautiful earth.

In Bielefeld this year more than 20 institutions participated. New was the delivery of the campaign materials by a cargo bicycle - an idea that many municipalities could reproduce!

We are the Future!

#### **Deutschland**

In Deutschland haben sich 68.442 Kinder aus über 140 Kommunen beteiligt und knapp 900. 000 Grüne Meilen gesammelt.

Immer mehr Einrichtungen beschäftigen sich nicht nur mit dem Thema Mobilität, sondern beziehen auch die Kampagnen-Themen Energie und regionale Lebensmittel stärker mit ein.
So sammelten sie grüne Aufkleber für klimafreundliche Wege, rote z.B. für selbstgemachtes Quittenmus und blaue Sticker, weil die "Licht-Polizei" nutzlos verschwendete Beleuchtung aufspürte oder für das Einsammeln von Müll auf dem Schulweg.

Auch in Murnau wurden Grüne Meilen gesammelt. Bei der lokalen Übergabe sagte der Bürgermeister: "Wir wollen zeigen, dass es in Murnau nicht notwendig ist, die Kinder mit dem Auto zur Schule zu bringen. Der Schulweg ist im Durchschnitt rund einen Kilometer lang- das ist zu Fuß gut zu schaffen." Und weil er schon mal da war, gaben die Kinder ihm gleich ein paar Wünsche mit auf den Weg: Mehr Spielplätze und die eine oder andere Fußgängerampel ...

Die Kinder der Pestalozzischule in Neuss haben gleich vier Wochen lang gesammelt! Eine abschließende Umfrage ergab, dass die meisten gerne zu Fuß, mit Fahrrad, Roller oder Bus zur Schule kommen, oft Laufgruppen bilden und auf dem Weg Freunde treffen. Viele Eltern nahmen die Umfrage zum Anlass auch weiterhin für den Schulweg aufs Auto zu verzichten.

In Allensbach wurden die Kinder gefragt, was es noch zu verbessern gäbe. Ganz vorne auf der Mängelliste stehen auf den Gehweg parkende Autos, da sie den Kindern den Weg erschweren und ihnen die Sicht auf den Verkehr nehmen.

Schon seit Jahren beteiligt sich der Kindergarten Pusteblume in Vöhringen an der Kindermeilen-Kampagne. Dieses Jahr haben die Kinder sich Gedanken darüber gemacht, was sie alles tun bzw. lassen sollten, "...um unsere schöne Erde zu erhalten".

In Bielefeld waren auch dieses Jahr wieder mehr als 20 Einrichtungen dabei. Novum war die Auslieferung der Kampagnenmaterialien per Lastenfahrrad - ein Beispiel dem viele Kommunen nacheifern sollten!

Ich schütze das Klima – I save the Climate!

## **Hungary**

Beyond collecting green footprints, kids could choose activities from a wide variety of exercises, like creating slogans and logos to promote tap water use, making posters about the importance of solar energy, turning old clothes into something else or creating a bird-friendly schoolyard. Many of the participating schools also take part at the 'Trees of Life' campaign and, together with the Hungarian member cities of Climate Alliance, planted native trees at their school yards or other public spaces.

## Move for the Climate! 2016 In five days four times around the world!

In Hungary Reflex Environmental Association and the Hungarian Climate Alliance, together with further partners, realized the campaign "Kids on the Move for Climate Action 2016" with great success.

In the activity week, from October 10<sup>th</sup> -14<sup>th</sup>, 12 987 children from 71 schools ZOOMed in and collected a total of 100 503 Green

Footprints - this is 4 times around the world!

The main topics of the activity week have been sun, drinking water, bird-friendly gardening and upcycling. As in previous years, the most popular exercise was the "Climate Picture" – a kind of group art formed by the students bodies, showing a living message about climate and environment.

## MOZDULJ A KLÍMÁĖRT!

2016. OKTOBER 10-14.

### Magyarország

#### Mozdulj a klímáért! 2016 Öt nap alatt négyszer a Föld körül

A Reflex Környezetvédő Egyesület, a Magyarországi Éghajlatvédelmi Szövetség és annak tagszervezetei 2016-ban ismét nagy sikerrel valósították meg a "Mozdulj a klímáért!" éghajlatvédelmi kampányhetet.

A 2016. október 10-14. közötti akcióhét során 71 iskola 12 987 diákja teljesítette a feladatokat, akik az öt nap alatt összesen 100 503 zöld mérföldet gyűjtöttek, melyekkel szimbolikusan ismét négyszer megkerülték Földünket!

A kampányhét fókuszában a Nap, az ivóvíz, a madárbarát kert és az újrahasznosítás gondolata állt. A korábbi évekhez hasonlóan a legnépszerűbb feladat ismét az élő közösségi klímakép készítése volt.

A zöld mérföldek gyűjtése mellett a diákok játékos kvízekkel vizsgálhatták, mennyire élnek környezetkímélő módon, logót és szlogent alkothattak az ivóvíz népszerűsítésére, madáretetőket, odúkat készíthettek és helyezhettek ki az iskola kertjébe. A Napot tetszőleges technikával örökíthették meg, és bemutathatták, hogyan lehet a kinőtt, szétszakad ruhákat "újragombolni", hasznosítani.

Az kampányban résztvevő iskolák közül több bekapcsolódott Világfák kampányunkba is, melyben őshonos facsemetéket ültetünk el a Éghajlatvédelmi Szövetség közösségeivel.

In Italy this year 4,997 children in 35 municipalities ZOOMed in and together added 176,412 Green Footprints.

In Piacenza this year 1,449 children in 14 schools collected 23,2750 Miglia Verdi
Many of the Pedibus Kids there also took part in the action Siamo nati per Camminare/Born to
Walk, were they had a race with a distance of 1,5 km – on their faces you could see how much fun this was!

With elder students they also did an education campaign on road safty called Siamo Tutti Pedoni/We are all Pedestrians, on road safety realized in collaboration with a class of the Local Art Lyceum "Cassinari". The students drew footprints on the streets to symbolize pedestrians as victims of road accidents.

In Formigine 86 children in four schools were contributing 18,304 Miglia Verde with the support of 29 adults (parents, grandparents, volunteers) by their Pedibus action to the ZOOM Campaign this year.

In Sacile 250 pupils from 5 primary schools collected Miglia Verde in the schoolyear 2015/16. With their Pedibus action and always carefully watched by Mr Hop, the kangaroo, they sum up to 50,000 Green Footprints, just with their journeys in the morning - congratulations!

In the region of Alto Adige/South Tyrol many children were collecting Climate Steps again: This year over 43 schools and 3,501 pupils from 32 municipalities took part and together collected 84,833 Klimaschritte /Climate Steps.

Many of them also visited an very interesting exhibition called KlimaReise /Climate Journey.

### Italia

Quest'anno in Italia 4 997 bambini di 35 comuni ZOOMed hanno contribuito a accumulare tutti insieme 176 412 Green Footprints.

A Piacenza, Formigine e Sacile si sono raccolte 91 335 Miglia Verdi con la partecipazione a diversi progetti piedibus.

In 32 comuni dell' Alto Adige/Südtirol, i 3 510 alunni di 43 scuole elementari hanno raccolto 84 833 KlimaSchritte (passi per il clima).

Two children from each participating municipality were invited as delegates. Some 40 children from across the country presented and discussed their ideas to combat climate change.

More than 31,000 children collecting over 230 000 Groene Voetstappen in the Netherlands.

In the Netherlands 31,453 children were walking and cycling for 'Groene Voetstappen' and handed them over to their local aldermen in September and October.

In total, the participating children collected 233,733 Green Footprints as well as many 'Gouden Voettstappen' for extra actions like saving water, planting trees, being a flexitarian or organizing a local climate summit.

As in previous years they also had a national Kinderklimaattop, this year in Rotterdam.

Golden Tipp, Panorama School Arnhem

"With exercise, running and swinging on the playground you can generate energy. We also want to save rainwater from the schoolyards and plant trees or bushes.."

## **Poland**

A school in Elk, Masuria, collected 5,461 Green Footprints with 371 kids in 12 classes.

Also in 2016 the children from Szkola Podstawowa nr 4 im. prof. W. Szafera 4 in Elk, where ZOOMing in!

This year the children aged 6 to 9 years were involved . 'Ecology – on the top!" - that was the Slogan for their activities. Once again they set off for the symbolic journey to the Climate Conference - this year to Morocco.

The ZOOM project was part of the environmental week, which was organized among the youngest students aged 6-9. It aims to make students aware of the importance of taking care of the environment and how they can contribute to its protection.

This year the youngest students played the most important role. They found out how to contribute to climate protection during the day.

To the surprise of the teachers they implemented many changes in their lives such as: resignation from means of the transport when there were less than two people in the car and changing the way of commuting for more beneficial and healthier ways like walking or riding a bike.

During the campaign it was possible to join the beneficial and pleasurable things – for every ecological route our students got the foot print stickers, they were awarded for the commitment and involvement in ecological issues.

Another possibility was drawing the blue bulb if the child had been taking care of saving electricity or drawing an apple if the child gave up on junk food like crisps, artificial drink as well as sweets.

The number of apples or bulbs had the same scoring as the number of feet. Our students very scrupulously had been making effort to improve this project and they became the role models for their parents and protectors.

This year's outcome is 5,461 feet, so it's 5,461 kilometers. Hurray, we got through to Morocco and even further!

## 480 pupils in Tecuci collected 13,729 Green Footprints in two schools and a preschool

Also in 2016 children in Tecuci, a city in the historical region of Moldavia were ZOOMing in again!

This year children from the schools "Elena Doamna" and "Anghel Rugină" participated with. The same enthusiasm. Together they collected 13,729 Green Footprints and also sent us photographs from their posters, footprints and their other actions during their activity weeks.

The children from School "Elena Doamna" were on the run for the 7th time already and made different posters, invented Future ECO means of transportation - just hoping their ideas become true one day.

Students from the 1st and 4th grade wrote messages for the climate conference in Marrakesh. The pupils from 4th grade also composed poems with their wishes and wrote them onto their footprints.

Do not pollute!

Come with us to save our environment!

We need fresh air!

Nu poluați!

Veniți alături de noi să salvăm mediul înconjurător!

Avem nevoie de aer curat!

#### 480 elevi din Tecuci au strâns 13729 tălpițe verzi în trei școli

Şi în anul 2016 copiii din Tecuci, un oraș din istorica zonă a Moldovei- România-, au participat la campania ZOOM. Şi în acest an, elevii din Școlile Gimnaziale "Elena Doamna" și Anghel Rugină" au participat la campanie. Împreună au strâns 13 729 de tălpițe verzi și ne-au trimis fotografii cu posterele unde au lipit tălpițele precum și imagini din timpul săptămânilor de activitate ZOOM.

Copiii de la școala Gimnazială "Elena Doamna" se află deja la a șaptea participare și au realizat pentru Conferința pe tema schimbărilor climatice de la Marrakesh diverse postere sugestive și au creat mijloace de transport eco, ce speră ca într-o zi să devină realitate. Copiii din clasele I A și a IV-a B au compus poezii și mesaje cu dorințele lor și le-au scris pe tălpițele verzi.

BE ECO!

Please plant trees, do not polute!

People will look up to you.

Walk and always save energy

You will be happy, you will see.

Don't drive car, just ride your bike

ECO be, don't be afraid!

Please recycle, please protect!

Just do an environment project!

Now, please listen to me 
Helpful you will be!

## **Sweden**

More 33,000 childrenin 262 schools were collecting Grön Footprints /Green Footprints in Sweden

The Swedish participants of the "Ga och cycla till Skolan/Walk and bike to school" Campaign of course joined us again.!

The campaign, organized by Trafik Kalendern, wants to inspire pupils, parents and teachers to travel in a smarter and healthier way - simply by walking, cycling and public transport! The activity is intended for all Swedish students and educators in year F-6.

During any two weeks in September-October, the participating schools gather as many *respoäng* (travel points, divided into "Gröna e Orange Prickar") as possible by walking, cycling or taking public transport to and from school.

The purpose of the challenge is to not only promote the health of children and young people, but also to contribute to a better environment and road safety.

In 2016 there were over 33,000 children in 262 schools involved and of course cycled, walked or used public transport for their journeys to school. As they gathered until the end of October we didn't have their number of Grön Footprints when the Climate Conference started.

Besides collecting 'gröna e orange Prickar' the children tried to advice car drivers to drive slowly and to be aware of children crossing the road. For the first time also municipalities were involved and awarded own local prizes.

# **ZOOM** – Kids on the Move for Climate Action 2016

ZOOM is Climate Alliance's annual campaign for kindergarten and elementary school children on sustainable mobility and the climate of our "One World."

Since 2002, more than 1.9 million children in 39 countries have ZOOMed in and collected

Green Footprints, Grüne Meilen, πράσινες πατούσες, Klimameilen, Groene Voetstappen, Miglia Verdi, Zelené Stopy, Zöld Mérföldet, Klimaschritte, Grön Footprints, Talpite Verzi

by using climate-friendly means of transport for their daily journeys.

With their collected Green Footprints, the children go on a "Joint Climate Voyage" around the "One World". This symbolic journey starts at the UNFCCC Secretariat in Bonn, Germany and, travelling once around the One World, ends at the annual UN Climate Conference where the children's Green Footprints, wishes and concerns are presented to the participants of the Climate Summit.

The ZOOM participants from all over Europe very much hope their work also encourages the adults at the UN Climate Conference to ZOOM in and take concrete steps on the global fight against climate change!

## www.zoom-kidsforclimate.eu

a campaign by:

For more than 25 years, Climate Alliance member municipalities have been acting in partnership with indigenous rainforest peoples for the benefit of the global climate. With over 1,700 members spread across 26 European countries, Climate Alliance is the world's largest city network dedicated to climate action and the only one to set tangible targets: each member city, town and district has committed itself to reducing greenhouse gas emissions by 10 percent every 5 years.

Recognising the impact our lifestyles can have on the world's most vulnerable people and places, Climate Alliance pairs local action with global responsibility. The network fosters cooperation with indigenous peoples, runs awareness raising campaigns and develops tools for climate action planning. It provides ample opportunity for participation and exchange while representing member interests at the national, European and international levels.

www.climatealliance.org

With the help and cooperation of many national and international partners
